

**Green Gen**  
TECHNOLOGIES®

## Try the Green Gen Water Bottle. Made in France from renewable materials.

No more single-use plastic bottles  
or water bottles produced  
on the other side of the planet!

### Remarkable benefits.

#### **Bio-sourced.**

Renewable raw materials.  
100% bio-sourced carbon content  
in accordance with standard EN 16620-2: 2019.

#### **Attractive.**

Many customisation options (depending on quantity).

#### **Light.**

Only 160 grams.

#### **Mechanical resistance.**

Composite structure.

#### **Reusable.**

Designed for everyday life.

#### **Unscrewable.**

The base can be unscrewed for easy and efficient  
cleaning, ensuring a long life for your bottle.

#### **Good to go.**

Comfortable grip with a removable handle.

The Green Gen Water Bottle  
is not made from glass,  
stainless steel or aluminium.  
It is a unique combination  
of wood fibre chips and a  
bio-sourced resin creating  
a brand-new, strong and  
renewable material.

## The Green Gen Water Bottle is made in the south-west.

The Green Gen Water Bottle is designed and produced in the south-west of France: researched and developed in Toulouse, designed and assembled in a production unit in Bergerac employing people with disabilities (ESAT).
